

EASY CLEANING AND MAINTENANCE

Maintenance:

Given their exceptional physical and mechanical properties, the regular maintenance of QUARTZ COMPAC materials only requires cleaning with a neutral pH product/detergent. Rinse with water and dry.

To remove any dirt or waste from the surface of QUARTZ COMPAC (i.e., oil and grease, wine, vinegar, lemon, fizzy drinks, coffee...), just wipe with a damp cloth dipped in a neutral pH detergent. Rinse with water and dry.

As examples, here are some solutions to common problems:

1 / Grease stains: dilute a small amount of detergent in water and rub the stain with a cloth. Then rinse with water.

2 / Loss of shines: use a gloss enhancer suitable for use on natural granite work surfaces.

3 / Limescale stains: pour vinegar (or any weak diluted acid) onto the surface of the countertop and leave it to work for 1 minute. Rinse with water.

4 / Silicone stains: remove using a sharp blade and a little solvent (acetone or ethanol).

Precautions:

Do not place QUARTZ COMPAC in locations subject to strong direct sunlight or expose it to UV lighting.

Avoid placing very hot objects on QUARTZ COMPAC surfaces (pans from fire or oven, deepfryers, etc.).

Do not use water-repellents or sealers to bring out shine.

Do not use stripping agents, caustic soda, degreasing products, or products with a pH over 10 or chloride-based products. When using bleach or solvents, rinse with water as soon as possible to avoid prolonged contact with the surface.

The surface of QUARTZ COMPAC must not be polished, neither floors nor worktops.

KITCHENS ALWAYS IN FASHION

QUARTZ COMPAC is made from top quality natural quartz using state-of-the-art technology. Thanks to its extraordinary physical and chemical properties, QUARTZ COMPAC is an extremely hard and highly decorative material. That is why its beauty will last.

THE STRONGEST DESIGN

The technical properties of COMPAC surfaces make them highly resistant to impact, to oils, to direct cutting and to abrasion. As well as being tough, COMPAC countertops come in a wide variety of textures, colours and finishes. The trend-setting designs can be cleaned and maintained easily for minimum absorption.

AMPLE RANGE OF TEXTURES, COLORS AND FINISHES

An elegant, high-resistant product, boasting premium quality, exceptional beauty and perfect finishes for countless interior design possibilities. The ideal material for any surfaces and floors in kitchens and bathrooms, as well as for other surfaces that have to withstand intense transit.

New line designed by Karim Rashid, takes its signature.

Finishes: polished, honed and ovo (ovo finish only available in colours bearing the symbol)
